PokerTracker4 is by far the best and most advantageous HUD poker software for players. If the goal is to make money playing poker, PokerTracker is not a necessary, but almost a necessary purchase. This software, made up of several different poker support tools, supports no-limit, pot-limit and limit poker. You can use PokerTracker 4 in Sit n' Go, Cash, MTT, Satellite, Spin & Go tournaments and, of course, in cash games like Texas hold'em and Omaha poker. The app works with Windows and Mac devices. All the marks and reviews say it's probably the best online poker toolbox in one place.

Special offer!

Buy the PokerTracker 4 software via our link and get 1 month free membership!

We

recommend that instead of reading good reviews, you try the app yourself now. You can do this completely free of charge. The developers of PokerTracker give you a 30-day free usage period. During this time, you will be able to try the software for free in Hold'em or Omaha games and get a closer look at how it works. If after the trial period you decide that you don't like the software, you can simply not buy it. However, we can safely say that you will be hard pressed to find a better HUD alternative on the market than PokerTracker4.

PokerTracker 4 - Why try it?

If you want to make money playing

poker, you will have to accept that if you don't use the software, your opponents will.

A monthly subscription or a one-off fee is definitely worthwhile, especially if you are

an active player. Since it is almost impossible to predict all possible scenarios and

outcomes in your head, and to read the actions of all the players at the table at the

same time, it's worth using a software program such as PokerTracker 4 to help you.

Because you can try it for free.

What is PokerTracker 4? (PT4)

PokerTracker is a

computer program. It requires Download, download (install), run and then use it immediately. PokerTracker 4 is a HUD and tracker in one.

HUD - what is it?

HUD is an

acronym for Heads-Up Display. We do not have an exact translation equivalent in the Lithuanian language, so we often hear names such as "Hood", "Heads-Up Display", or we write the untranslated name at all. In fact, HUD describes the video projection technology that creates the image in front of our eyes. In simpler terms, it adds something to a normal image on some surface.

The best example of HUDs is HUD

projections in new cars. A special projector projects important data onto the windscreen of the car (e.g. the speed, the track you are driving on, etc.). They are not there, but they are projected there. So, in fact, a HUD can also be called a projection. In the case of PokerTracker 4, the HUD projects an image "on top" of what the poker software itself is displaying. More precisely, it adds to the visible image.

In poker, the HUD acts as a tool that helps you easily see a large amount of data about the game, all at once. It fills the regular application screen with a wide range of relevant information (e.g. win probabilities, player action history, etc.).

The HUD allows you to see your odds in clear percentages and simplifies decision making. The data changes in real time, so you'll always have as much information as possible at the time you need to make your move.

Tracker - what is it?

PokerTracker is

not just a HUD or visual aid. It also has great analytical potential. Analytical tools that track and analyse the progress of the game are called trackers. With PokerTracker4 it is very easy to keep track of your past game statistics, to see various indicators such as Flop Flop %, Preflop Limp %, Pre Flop Raise % and others. By looking at this data and analysing it, you can not only see how much you've won, but you can also find out what you could do differently to win more, what mistakes you're making, where in the game you're getting pressured and so on. New and experienced players alike will notice and appreciate how many features the app has. There are some disappointments with some of the other HUD-type applications. Other HUDs or tracker-type applications offer only very superficial real-time assistance. PokerTracker 4 puts so many analytical tools on a plate, collects so much data and works so well that you really don't need to buy any add-ons or plug-ins to improve your results.

Where can I play

PokerTracker 4?

Perhaps the most interesting thing that puzzles every player before choosing a poker software is where will it be available to play? As you probably all know, an app needs to support a poker room and be compatible in order to take advantage of the features it offers.

PokerTracker shines brightly here again, as both Windows and Mac users can play it pretty much anywhere. It's true that the latter will enjoy a slightly narrower list of rooms, but the result is still very good.

PokerTracker 4

poker rooms for Windows PCs available 888Poker, PokerStars, Winamax, MPN and many more.

Full list:

Mac owners can connect to 888Poker, PokerStars, Winamax, Merge, Full Tilt and several others. Full list:

We advise you to check that the software supports your favourite poker room before you buy or invest in it. Otherwise, it's worth upgrading to one of the supported rooms, at least for a trial period. Believe me, the benefits will

be noticeable, so it pays to play wherever you find it easier. Don't forget that you can register in some rooms at an exclusive PokerSchool discount. Don't miss out on this opportunity!

How to get started?

This section will give you a brief overview of how to download, sign up and start using the application. However, there is also a video guide to help beginners. You will need a little patience at the beginning. Although it will only take you up to 10 minutes, certain steps require attention and patience. We've put it all in one place for your convenience.

How do I download and install the PokerTracker 4 HUD?

Click on the link. Download the application and run the downloaded file. The installation will start. Accept the terms and conditions, select the location on your disk where you want the programme to be saved. Wait for the installation to finish. It usually takes a few seconds. Start the app. Enter your registration code (if you have one) in the window that pops up, or choose a 30-day free trial with Texas Hold'em or Omaha poker games. In the next window, the program will ask you to subscribe to a PostgreSQL database. Please accept this, as this database/application is free and allows you to store your hand history. The recording will be done automatically. Accept the PostgreSQL server settings (do not change anything) and complete the installation (takes about a minute). Now you will need to create your own database using PostgreSQL. You can have more than one of these databases, but one will be enough to start with. Give it a unique name (if you wish). Do not change any other settings. Create the database and accept the offer to have PokerTracker HUD link the data to PostgreSQL. In about half a minute everything should be connected. Proceed to the final configuration (select the currency you are playing in, then select the rooms you will be playing in, and check that the hand history settings in the poker room software match the PokerTracker 4 settings.

Finally, harmonise the layout and number of Seating. The configuration of the individual poker rooms follows, but do it according to your needs. Basically, the programmers have prepared clear guides for each room, which are easy to follow and to calibrate all settings. Finally, select the desired HUD view (how the data appears on the screen). Next, in the app, click on Play Poker and Get Hands While Playing in the top left.

That's it, let's play!

P.S. Please note that the HUD will only activate when you have played one hand. Don't be alarmed.

PokerTracker 4 HUD and Tracker Benefits

We can easily find more than one reason to use it. For those who are serious about online poker and for those who want the best possible results, this app can be a step up or a breath of fresh air after an unsuccessful stretch. Once you get to know the tracker's analytical tools properly, you will inevitably improve your results. Well, here are the biggest advantages of this app

Personalisation

It is most

often described as a flexible and very versatile tool for poker players. Its appearance and data presentation can be changed to suit your needs. The HUD is fully customisable, which means that each player can change it as they see fit. Reports and statistics are collected and generated automatically and the software is very user-friendly.

Supports

a large number of poker rooms

Not all HUDs or trackers are compatible with popular

poker rooms. Some expensive tools work in isolated or little-known poker rooms. PokerTracker does not have such problems. It is compatible with the world's most popular poker rooms for both Mac and Windows operating systems.

Free to try

The app

itself offers a 14-day free trial period. However, with the Pokeriomokyla link you can try the app for up to 30 days. Other apps do not offer this.

Lots of different tools

No

matter how calculating and methodical a player you are, you probably won't be able to tell what percentage of your hands have made it to the showdown stage or see your Luck Bell curve. PokerTracker 4 will show and reveal all the numbers.

Special offer! Buy the

PokerTracker 4 software via our link and get 1 month free membership!

What do users say

about PokerTracker 4?

We will also share the views of other internauts and active poker players about the software.

"PokerTracker 4 stands out as one of the best apps for playing poker online. Users have: access to revealing reports, a wealth of configurable and changeable settings, and everything to make it compatible with other applications.

Online poker is simply too fast for you to be able to accurately analyse and calculate everything yourself in real time. But with PokerTracker 4, you can not only follow the action and keep an eye on the situation from the outside, but you can also get ahead of the game and stay one step ahead of the game. In this game, every advantage counts, so take advantage of it as soon as you can."

- Cardschat

"With the

PokerTracker HUD, you can 'read' the situation at key moments. In online poker, it is essential to read your opponents' behaviour. This is especially important if you play multi-table poker or Zoom poker. There are simply too many players to keep track of everything. The PokerTracker 4 HUD allows you to constantly see, and have a wealth of statistics in front of you, not somewhere far away, but right on the poker table itself. This information will allow you to see and see exactly who you are up against.

However, the PokerTracker database is the element that plays the most important, game-changing role. This is the feature of the software that is most appreciated by poker professionals. It is in the database that we can check our hands and filter the information to find gaps and close them. It's also where we can analyse our opponents' play to find the best ways to beat them, and understand what strategies they are using that might be better than ours at the moment.

Finally, if you're serious

about online poker, it's time to download a tracking/HUD software like PokerTracker4.

-

Blackrain79

PokerTracker 4 features an exceptionally flexible HUD technology that adapts to your table sizes with surprising accuracy.

A real-time vector HUD that

automatically, instantly adapts to your table size and changes. It is currently the most advanced HUD system on the market and is exclusively available on PokerTracker 4.

Additional pop-ups that can be assigned to a specific player or statistic.

Choice

between all information about a player and only information about this table, this session.

Ability to filter player stats by effective stack in real time.

The ability to

see your own and your opponents' BB or M count in real time, after each hand.

The

ability to view and annotate hands in real time.

Reports, graphs and

filters.

PokerTracker 4 allows you to see your game in the form of detailed graphs and charts. It's important to note that all of the built-in analysis features and add-ons are included in the basic package and do not come at an additional cost, as is the case with competitor software. The entire system of graphs, filters and reports has been redesigned and developed to make it as easy as possible for the user to understand and use.

View reports, and double-click on a report to go to a more detailed level of that report, allowing you to analyse your game down to the last detail.

Hand analysis

provides a percentage win against the opponent's hand or the opponent's entire range.

LeakTracker helps you solve basic problems simply by using PokerTracker's training videos.

The Luck Bell Curve is a good indicator of whether we are on the lucky streak or lagging behind the variation. It shows how our results differ from the actual EV.

The Money Flow graph shows how money moves between players and where we make the most money.

It's very easy to create and save your own separate reporting systems.
